Professional Summary

Computer Science undergraduate with hands-on experience in full-stack web development through internships and academic projects. Experienced in developing REST APIs, building responsive web applications, and applying software engineering principles to build scalable solutions.

Educational Qualifications

B.Tech (CSE), GMR Institute of Technology, Rajam | **CGPA: 8.90** 2023–2027

Intermediate (MPC), Vidya Vikas Junior College, Eluru | **Percentage: 96.6%** 2021–2023

SSC, ZPP High School, Raghavapuram | **Percentage: 93.67%** 2021

Internship Experience

1. **MERN Stack Developer Intern – Codec Technologies** Oct 2025

- Worked on MERN Stack projects, gaining practical experience in REST API development, MongoDB integration, and frontend-backend communication.
- Collaborated in a team environment to understand application architecture, routing, and API integration while following MERN development best practices.

2. **AI Technologies Intern – EdyGrad** June 2025

- Learned the fundamentals of Machine Learning, including supervised learning, data preprocessing, model training, and evaluation using Python.
- Implemented basic machine learning models through guided assignments, gaining hands-on experience in applying ML concepts to real datasets.

Projects

1. **Visit AP – Full-Stack Tourism Platform** [GitHub](#) | [Live Link](#) | React.js, Node.js, Express.js, MongoDB

- Developed a scalable full-stack tourism platform for exploring 260+ tourist destinations across 26 districts of Andhra Pradesh.
- Implemented REST APIs, JWT authentication, destination management, user reviews, ratings, and geolocation-based navigation using the MERN Stack.

2. **FarmerDirect – Farmer-to-Consumer Marketplace** [GitHub](#) | [Live Link](#) | React.js, Node.js, Express.js, MongoDB

- Developed a full-stack marketplace connecting farmers directly with consumers to enable transparent and efficient agricultural trade.
- Implemented JWT-based authentication, product listing, shopping cart, order placement, and customer review functionalities using the MERN Stack.

3. **Buy Smart – Product Recommendation System** [GitHub](#) | React.js, Python, JavaScript, Web Scraping

- Developed a product recommendation and price comparison system to help users discover relevant products across multiple e-commerce platforms.
- Implemented web scraping, content-based recommendation, and product filtering techniques to deliver personalized recommendations.

Technical Skills

Programming: C++, Python, JavaScript

Frontend: HTML, CSS, React.js

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, MySQL

Tools: Git, GitHub, VS Code, Postman

Strengths

Problem Solving • Teamwork • Adaptability
Communication • Continuous Learning

Languages Known

Telugu (Native) • English (Fluent)

Achievements & Activities

- Solved 250+ DSA problems across coding platforms
- First Place – Vibe with Data, STEP CONE 2026
- Achieved 2-Star Rating on CodeChef
- Global Rank 17,600 – TCS CodeVita Season 13
- Selected for NSF × Adobe Mentorship Program
- Active NSS Volunteer

Certifications

- Introduction to MERN Stack – Simplilearn
- Frontend Developer & JavaScript – Infosys Springboard
- Joy of Computing in Python – NPTEL
- Problem Solving – HackerRank
