Professional Summary

Computer Science undergraduate with hands-on experience in full-stack web development using the MERN stack and strong problem-solving skills. Skilled in building responsive web applications, REST APIs, database-driven systems, and recommendation-based solutions. Passionate about software engineering, AI-powered applications, and scalable web technologies.

Educational Qualifications

- B.Tech — CSE** 2023–2027
GMR Institute of Technology, Rajam | **CGPA: 8.9**
- Intermediate — MPC** 2021–2023
Vidya Vikas Junior College, Eluru | **GPA: 9.6**
- Secondary Education (10th)** 2021
ZPP High School, Raghavapuram | **GPA: 9.7**

Internship Experience

- MERN Stack Developer Intern — Codec Technologies** Oct 2025
 - Learned full-stack web development using the MERN Stack and worked on REST API development and integration.
 - Built and integrated web application features using React.js, Node.js, Express.js, and MongoDB.
- AI Technologies Intern — EdyGrad** June 2025
 - Learned Artificial Intelligence and Machine Learning fundamentals, including supervised and unsupervised learning concepts.
 - Gained hands-on experience in Python, data preprocessing, model training, and evaluation techniques.

Projects

- Visit AP - Tourism Website** GitHub | Live Demo
 - Developed a tourism platform that helps users explore tourist destinations across Andhra Pradesh with location-based information and travel guidance.
 - Developed REST APIs and integrated MongoDB for managing destinations, reviews, ratings, and dynamic content.
 - Tech Stack:** React.js, Node.js, Express.js, MongoDB
- FarmerDirect - Farmer to Consumer Platform** GitHub
 - Developed a digital marketplace connecting farmers directly with consumers, eliminating intermediaries and improving market accessibility.
 - Implemented JWT authentication, product management, order processing, reviews, and location-based product discovery.
 - Tech Stack:** React.js, Node.js, Express.js, MongoDB
- Buy Smart - Recommendation System** GitHub | Live Demo
 - Built a product recommendation system that helps users discover relevant products from multiple e-commerce platforms.
 - Applied filtering techniques and web scraping to generate personalized recommendations using user behavior and product data.
 - Tech Stack:** React.js, JavaScript, Python, Web Scraping

Skills

Programming

C++, Python

MERN & Web Technologies

HTML, CSS, JavaScript, React.js
Node.js, Express.js

Databases

MongoDB, MySQL

Tools

Git, GitHub, VS Code, Postman

Soft Skills

Teamwork, Continuous Learning

Core Concepts

DSA, OOPs, DBMS

Achievements & Certifications

Achievements

- Solved 250+ DSA problems with 50+ day coding streak
- Selected for NSF x Adobe Mentorship Program
- First Place – Vibe with Data, STEPCONE 2026
- Active NSS Volunteer

Certifications

- Introduction to MERN Stack – Simplilearn SkillUp
- Frontend Developer, JavaScript – Infosys Springboard
- Joy of Computing in Python – NPTEL
- Problem Solving – HackerRank
